

Kitchen2MyTable HeyGen Video Generation Contractor Brief

Project Overview

Kitchen2MyTable is seeking an experienced HeyGen professional to improve our recipe-video generation workflow and help establish best practices for scalable video production.

A HeyGen seat will be provided for use during this project. You are not required to supply your own HeyGen subscription. Access will be provided so you can work directly within our environment and evaluate the workflow as intended.

Current Workflow

1. Select a recipe from Kitchen2MyTable.com and note the Recipe ID.
2. Enter the Recipe ID into our prompt-builder tool.
3. Generate and copy the prompt.
4. Paste the prompt into HeyGen using Script to Video.
5. Generate the recipe video.

Primary Objectives

- Improve overall video quality.
- Apply current HeyGen best practices.
- Improve pacing, scene flow, transitions, voice delivery, and viewer engagement.
- Review and improve the generated prompts.
- Recommend improvements to the PHP prompt-builder workflow.
- Identify opportunities for future automation using the HeyGen API.

Reference Video

Review the sample Kitchen2MyTable video provided by management. The goal is to match the concept while improving the overall quality, polish, consistency, and professionalism of the final output.

What We Are Looking For

We are not simply looking for a video editor. We are looking for someone who understands HeyGen at an advanced level and can provide recommendations that improve both the quality of the videos and the efficiency of the overall workflow.

Contractor Questionnaire

1. How long have you been using HeyGen?
2. How often do you use HeyGen?
3. Do you currently have access to a HeyGen account?
4. What level of experience do you have with HeyGen's advanced features?
5. Have you created recipe or food-related videos before?
6. Please provide examples of HeyGen videos you have created.
7. What improvements would you make to our current workflow?
8. Have you worked with the HeyGen API?
9. Do you have experience with PHP, APIs, or workflow automation?
10. What recommendations would you make to move toward automated recipe video generation?

Long-Term Goal

Our long-term objective is a system where a Recipe ID is selected, an optimized prompt is automatically generated, and high-quality videos can eventually be produced through an automated workflow. Experience with automation, prompt engineering, and workflow design is highly valued.
